1 Adjunction

$$U\varepsilon \circ \eta U = 1_U$$

$$\varepsilon F \circ F\eta = 1_F$$

$$f : a \rightarrow Ub$$

$$\begin{array}{ccc} & & FU(b) \\ & \nearrow^{F(f)} & \downarrow \varepsilon(b) \\ F(a) & \xrightarrow{f^*} & b \end{array}$$

$$\begin{array}{ccc} UF(a) & \xrightarrow{U(f^*)} & Ub \\ \eta(a) \uparrow & \nearrow f & \\ a & & \end{array}$$

Universal mapping problem is for each $f : a \rightarrow Ub$, there exists f^* such that $f = U(f^*)\eta$.

2 Adjunction to Universal mapping

In adjunction $(F, U, \varepsilon, \eta)$, put $f^* = \varepsilon(b)F(f)$, we are going to prove f^* is a solution of Universal mapping problem. That is $U(f^*)\eta = f$.

$$\begin{array}{ccc}
 & \xrightarrow{U(\varepsilon(b)F(f))=U(f^*)} & \\
 UF(a) & \xrightarrow{UF(f)} UFUb & \xrightarrow{U(\varepsilon(b))} ? \\
 \eta(a) \uparrow & & \uparrow \eta(Ub) \\
 a & \xrightarrow{f} & Ub
 \end{array}$$

$$\begin{array}{ccc}
 UF(a) & \xrightarrow{UF(f)} & UFUb \\
 \eta(a) \uparrow & \searrow U(f^*) & \uparrow \eta(Ub) \\
 a & \xrightarrow{f} & Ub
 \end{array}
 \begin{array}{c}
 \uparrow \\
 \downarrow \\
 U(\varepsilon(b))
 \end{array}$$

$$\begin{array}{ccc}
 F(a) & \xrightarrow{F(f)} & FU(b) \\
 & \searrow f^* & \downarrow \varepsilon(b) \\
 & & b
 \end{array}
 \quad U\varepsilon \circ \eta U = 1_U$$

$$U(\varepsilon(b))\eta(U(b)) = 1_{U(b)}$$

means that

$\varepsilon(b) : FU(b) \rightarrow b$ is solution of $1_{U(b)}$.

naturality $f\eta(U(b)) = U(F(f))\eta(a)$

gives solution $U(\varepsilon(b))UF(f) = U(F(f))\varepsilon(b)$ for f .

$$U(f^*)\eta(a)(a) = f(a)$$

then

$$U(\varepsilon(b)F(f))\eta(a)(a) = U(\varepsilon(b))UF(f)\eta(a)(a)$$

since F is a functor. And we have

$$U(\varepsilon(b))UF(f)\eta(a)(a) = U(\varepsilon(b))\eta(b)f(a)$$

because of naturality of η

$$\begin{array}{ccc} UF(a) & \xleftarrow{\eta(a)} & a \\ \downarrow UF(f) & & \downarrow f \\ UF(b) & \xleftarrow{\eta(b)} & b \end{array} \quad UF(f)\eta(a) = \eta(b)f$$

too bad.... we need some thing more.

2.1 Adjoint of

$$U\varepsilon \circ \eta U = 1_U$$

$$F(a) \xrightarrow{F(f)} FU(b) \xrightarrow{\varepsilon(b)} b$$

$$UF(a) \xrightarrow{UF(f)} UFU(b) \xrightarrow{U(\varepsilon(b))} U(b)$$

$$a \xrightarrow{\eta(a)} UF(a) \xrightarrow{UF(f)} UFU(b) \xrightarrow{U(\varepsilon(b))} U(b)$$

$$a \xrightarrow{f} Ub \xrightarrow[\eta(Ub)]{\eta(Ub)} UFU(b) \xrightarrow[U(\varepsilon(b)=1)]{U(\varepsilon(b))} U(b)$$

$$U\varepsilon \circ \eta U = 1_U$$

naturality of $f : a \rightarrow Ub$

$$\begin{array}{ccc} Ub & \xrightarrow{\eta(Ub)} & UF(Ub) \\ \uparrow f & & \uparrow UF(f) \\ a & \xrightarrow{\eta(a)} & UF(a) \end{array}$$

$$\begin{array}{ccc}
UF(a) & \xrightarrow{UF(f)} & UF(U(b)) \\
\uparrow \eta(a) & & \uparrow \eta(U(b)) \\
a & \xrightarrow{f} & U(b)
\end{array}
\quad
\begin{array}{c}
UF(U(b)) \\
\downarrow U(\varepsilon(U(b))) \\
U(b)
\end{array}$$

Solution of universal mapping yields naturality of $U\varepsilon \circ \eta U = 1_U$.
 $\varepsilon F \circ F\eta = 1_F$.

$$\begin{array}{ccccc}
UF(a) & & F(a) & \xrightarrow{F(\eta(a))} & FUF(a) \\
\uparrow \eta(a) & \searrow 1_{UF(a)} & & \searrow 1_{F(a)} & \downarrow \varepsilon(F(a)) \\
a & \xrightarrow{\eta(a)} & UF(a) & \xrightarrow{(1_{UF(a)})^*} & F(a)
\end{array}$$

3 Universal mapping to adjunction

Functor U , mapping $F(a)$ and $(f)^*$, $U(f^*)\eta(a) = f$ are given.
object $F(a) : A \rightarrow B$
 $\eta(a) : a \rightarrow UF(a)$
put

$$\begin{aligned}
F(f) &= (\eta(b)f)^* \\
\varepsilon &: FU \rightarrow 1_B \\
\varepsilon(b) &= (1_{U(b)})^*
\end{aligned}$$

$$F(a) \xrightarrow{f^*} b$$

$$\begin{array}{ccc}
UF(a) & \xrightarrow{U(f^*)} & Ub \\
\uparrow \eta(a) & \nearrow f & \\
a & &
\end{array}$$

$$f = U(f^*)\eta$$

Show F is a Functor, that is $F(fg) = F(f)F(g)$.

Show naturality of $\eta(a)$.

$$f : a \rightarrow b, F(f) = (\eta(b)f)^*$$

Show naturality of $\varepsilon(b) = (1_U)^*$.

3.1 Definitions

f's destination

$$f : a \rightarrow U(b)$$

universal mapping

$$U(f^*)\eta(a) = f$$

definition of F(f)

$$F(f) = (\eta(U(b))f)^*$$

definition of ε

$$\varepsilon(b) = (1_{U(b)})^*$$

$$\begin{array}{ccc}
 FUF(a) & \xrightarrow{FU(f^*)} & FU(b) \\
 F(\eta(a)) \left(\begin{array}{c} \uparrow \\ \varepsilon(F(a)) \\ \downarrow \end{array} \right) & \nearrow F(f) & \downarrow \varepsilon(b)=(1_U)^* \\
 F(a) & \xrightarrow{f^*} & b
 \end{array}$$

$$\begin{array}{ccc}
 UF(a) & \xrightarrow{UF(f)} & UFU(b) \\
 \eta(a) \left(\begin{array}{c} \uparrow \\ \eta(U(b)) \\ \downarrow \end{array} \right) & \searrow U(f^*) & \left(\begin{array}{c} \uparrow \\ U(\varepsilon(b)) \\ \downarrow \end{array} \right) \\
 a & \xrightarrow{f} & U(b)
 \end{array}$$

$$\begin{aligned}
 \varepsilon F \circ F \eta &= 1_F, \varepsilon(b) = (1_{U(b)})^*, \\
 \varepsilon(F(a)) &= (1_{UF(a)})^*
 \end{aligned}$$

$$\begin{array}{ccccc}
UF(a) & & F(a) & \xrightarrow{F(\eta(a))} & FUF(a) \\
\uparrow \eta(a) & \searrow U(1_{F(a)}) & & \searrow \varepsilon(F(a)) & \downarrow \uparrow F(\eta(a)) \\
a & \xrightarrow{\eta(a)} & U(F(a)) & & F(a) \\
& & & \nearrow 1_{F(a)} &
\end{array}$$

3.2 Functor F

$$F(f) = (\eta(b)f)^*$$

$$U(F(f))\eta(a) = \eta(b)f$$

show $F(fg) = F(f)F(g)$

$$a \xrightarrow{g} Ub \xrightarrow{f} U Uc$$

$$U(F(g))\eta(a) = \eta(Ub)g$$

$$U(F(f))\eta(Ub) = \eta(UUc)f$$

show

$$U(F(f)F(g))\eta(a) = \eta(UUc)fg$$

then $F(f)F(g) = F(fg)$

$$\begin{aligned}
U(F(f)F(g))\eta(a) &= UF(f)UF(g)\eta(a) \\
&= UF(f)\eta(Ub)g \\
&= \eta(UUc)fg
\end{aligned}$$

Q.E.D.

$$\begin{array}{ccccc}
F(a) & \xrightarrow{F(g)} & FU(b) & \xrightarrow{FU(f)} & FUU(c) \\
& \searrow g^* & \downarrow \varepsilon(b) & \searrow f^* & \downarrow \varepsilon(Uc) \\
& & b & & U(c)
\end{array}$$

$$\begin{array}{ccccc}
UF(a) & \xrightarrow{UFg} & UFUb & \xrightarrow{UFf} & UFUUC \\
\eta(a) \uparrow & \searrow U(g^*) & \uparrow \eta(Ub) & \searrow Uf^* & \uparrow \eta(UUc) \\
a & \xrightarrow{g} & Ub & \xrightarrow{f} & UU(c)
\end{array}$$

3.3 naturality of

$$\eta : 1 \rightarrow UB$$

$$\begin{array}{ccc}
UF(a) & \xrightarrow{UF(f)} & UFb \\
\eta(a) \uparrow & & \uparrow \eta(b) \\
a & \xrightarrow{f} & b
\end{array}$$

$$\text{prove } \eta(b)f = UF(f)\eta(a)$$

$$\begin{aligned}
\eta(b)f & : a \rightarrow UFb \\
F(f) & = (\eta(b)f) * \quad (\text{definition}) \\
\eta(b)f & = U(F(f))\eta(a)
\end{aligned}$$

Q.E.D.

3.4 naturality of

$$\varepsilon : FU \rightarrow 1_B$$

$$U : B \rightarrow A$$

$$\begin{aligned}
\varepsilon(b) & = (1_{U(b)}) * \\
U(\varepsilon(b))\eta(U(b)) & = 1_{U(b)}
\end{aligned}$$

$$U(\varepsilon(b))\eta(U(b))U(b) = U(b)$$

$$\begin{array}{ccc} FU(b) & \xrightarrow{FU(f)} & FU(c) \\ \downarrow \varepsilon(b) & & \downarrow \varepsilon(c) \\ b & \xrightarrow{f} & c \end{array}$$

prove $f\varepsilon(b) = \varepsilon(c)FU(f)$

$$f = Ub \rightarrow Uc$$

$$F(Ub) \xrightarrow{(1_{Ub})^*} b \xrightarrow{f} c$$

$$\begin{array}{ccccc} UF(Ub) & \xrightarrow{U(1_{Ub})^*} & Ub & \xrightarrow{U(f)} & U(c) \\ \uparrow \eta(Ub) & \nearrow UFU(f) & \nearrow U(1_{U(c)^*}) & \nearrow & \nearrow \\ & & UFUc & & \\ & & \uparrow \eta(Uc) & & \\ Ub & \xrightarrow{U(f)} & Uc & & \end{array}$$

$$F(Ub) \xrightarrow{FU(f)} FU(c) \xrightarrow{(1_{U(c)})^*} c$$

show $\varepsilon(c)FU(f)$ and $f\varepsilon(b)$ are both solution of $(1_{Uc})U(f)(= U(f)(1_{Ub}))$

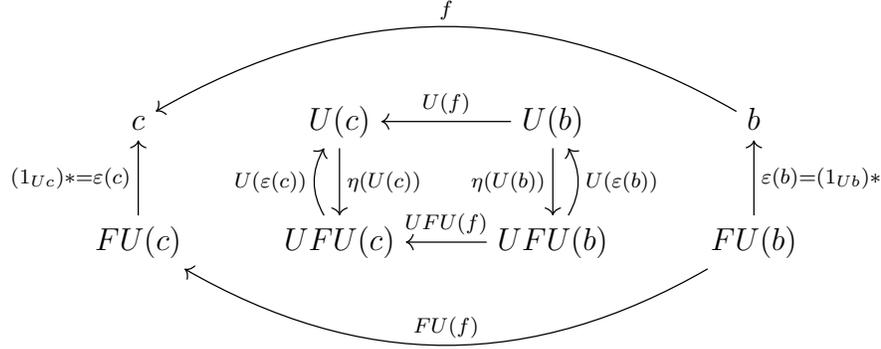

$$\begin{aligned} (f\varepsilon(b))\eta(Ub)Ub &= U(f)U(\varepsilon(b))\eta(Ub)Ub \\ &= U(f)1_{Ub}Ub = U(f)Ub = Ufb = U(f)(1_{Ub})Ub \\ f\varepsilon(b) &= (U(f)(1_{Ub}))^* \end{aligned}$$

$UFU(f)\eta(Ub) = \eta(Uc)U(f)$ naturality of

$$\begin{aligned} U(\varepsilon(c)FU(f))\eta(Ub)Ub &= U(\varepsilon(c))UFU(f)\eta(Ub)Ub \\ &= U(\varepsilon(c))\eta(Uc)U(f)Ub = 1_{U(c)}U(f)Ub = U(f)Ub = U(f)(1_{Ub})Ub \end{aligned}$$

$$U(\varepsilon(c))\eta(Uc) = 1_U(c)$$

end of proof.

It also prove

$$U\varepsilon \circ \eta U = 1_U$$

3.5 $U\varepsilon \circ \eta U = 1_U$

$$\varepsilon(b) = (1_U(b))^*$$

that is

$$U((1_U(b))^*)\eta(U(b)) = 1_U(b) \quad U(\varepsilon(b))\eta(U(b)) = 1_U(b)$$

$$U\varepsilon \circ \eta U = 1_U$$

3.6 $\varepsilon F \circ F\eta = 1_F$

$$\eta(a) = U(1_F(a))\eta(a)$$

$$\Rightarrow (\eta(a))^* = 1_F(a) \dots (1)$$

$$\varepsilon(F(a)) = (1_U F(a))^*$$

$$\Rightarrow 1_U F(a) = U(\varepsilon(F(a)))\eta(UF(a))$$

times $\eta(a)$ from left

$$\eta(a) = U(\varepsilon(F(a)))\eta(UF(a))\eta(a)$$

$$\eta(UF(a)) = UF\eta(a) \text{ naturality of } \eta$$

$$\eta(a) = U(\varepsilon(F(a)))(UF\eta(a))\eta(a)$$

$$= U(\varepsilon(F(a))F\eta(a))\eta(a)$$

$$\Rightarrow (\eta(a))^* = \varepsilon(F(a))F\eta(a) \dots (2)$$

from (1),(2), since $(\eta(a))^*$ is unique

$$\varepsilon(F(a))F\eta(a) = 1_{F(a)}$$

$$\begin{array}{ccccc}
 UF(a) & \xrightarrow{F} & FUF(a) & \xrightarrow{U} & UFUF(a) \\
 \eta(a) \uparrow & & \begin{array}{c} \uparrow \\ F(\eta(a)) \\ \downarrow \end{array} & \begin{array}{c} \uparrow \\ \varepsilon(F(a)) \\ \downarrow \end{array} & \begin{array}{c} \uparrow \\ \eta(UF(a)) \\ \downarrow \end{array} & \begin{array}{c} \uparrow \\ U(\varepsilon F(a)) \\ \downarrow \end{array} \\
 a & \xrightarrow{F} & F(a) & \xrightarrow{U} & UF(a) \\
 & & (\eta(a))* = 1_{Fa} \uparrow & & \uparrow \eta(a) = U(\varepsilon F(a))\eta(UF(a)) \\
 & & F(a) & \xrightarrow{U} & UF(a)
 \end{array}$$

$$\begin{array}{ccc}
 UF(a) & \xrightarrow{F} & FUF(a) & \xrightarrow{U} & UFUF(a) & & FUF(a) \\
 \uparrow \eta(a) & & \begin{array}{c} \uparrow \\ F(\eta(a)) \\ \downarrow \end{array} & \begin{array}{c} \uparrow \\ \varepsilon(F(a)) \\ \downarrow \end{array} & \begin{array}{c} \uparrow \\ U(\varepsilon F(a)) \\ \downarrow \end{array} & \begin{array}{c} \uparrow \\ \eta(UF(a)) \\ \downarrow \end{array} & \begin{array}{c} \uparrow \\ \varepsilon(F(a)) \\ \downarrow \end{array} \\
 a & \xrightarrow{F} & F(a) & \xrightarrow{U} & UF(a) & & F(a)
 \end{array}$$

$$\begin{array}{c}
 UUF(a) \\
 \eta(UF(a)) \begin{array}{c} \uparrow \\ \downarrow \end{array} \begin{array}{c} \uparrow \\ U(\varepsilon(Fa)) \\ \downarrow \end{array} U(\varepsilon(F(a)))\eta(UF(a)) = 1_U F(a) \\
 UF(a)
 \end{array}$$

$$\varepsilon(F(a)) = (1_U F(a))*$$

$$\begin{array}{ccc}
 FA & \longrightarrow & UFA \\
 \downarrow F\eta(A) & & \downarrow U\eta A \\
 FUF(A) & \longrightarrow & UFUFA
 \end{array}$$

$\varepsilon(F(A))$ の定義から $U(\varepsilon(F(A))) : UFUFA \rightarrow UFA$
 唯一性から $\varepsilon(F(A)) : FUF(A) \rightarrow FA$ 従って

$$\varepsilon(F(A))F\eta(A) = 1$$

ってなのを考えました。

$$\begin{array}{l}
 U\eta(A') = U(1_{FA'})\eta(A') \text{ より} \\
 \eta(A')* = 1_{FA'},
 \end{array}$$

$U\eta(A') = U(\varepsilon(F A')F\eta(A'))\eta(A')$ より
 $\eta(A')^* = \varepsilon(F A')F\eta(A')$ から
 $1_F = \varepsilon F.F\eta$ は言えました。

後方で η の自然性と ε の定義を使いました。

4 おまけ

$$\varepsilon F \circ F\eta = 1_F, U\varepsilon \circ \eta U = 1_U$$

$$\begin{array}{ccc}
 UFU(a) & \xleftarrow{U} & FU(a) \\
 \eta(U(a)) \left(\begin{array}{c} \uparrow \\ \downarrow \end{array} \right) U(\varepsilon(a)) & & \downarrow \varepsilon(a) \\
 U(a) & \xleftarrow{U} & (a)
 \end{array}$$

$$\begin{array}{ccc}
 FUF(a) & \xleftarrow{F} & UF(a) \\
 F\eta(a) \left(\begin{array}{c} \uparrow \\ \downarrow \end{array} \right) \varepsilon F(a) & & \uparrow \eta(a) \\
 F(a) & \xleftarrow{F} & (a)
 \end{array}$$

なら、 $FU(\varepsilon(F(a))) = \varepsilon F(a)$?

$$\begin{array}{ccc}
UFU(F(a)) & \xleftarrow{U} & FU(F(a)) \\
\eta(U(a)) \left(\begin{array}{c} \uparrow \\ \downarrow \end{array} \right) & & \downarrow \varepsilon(F(a)) \\
U(F(a)) & \xleftarrow{U} & F(a)
\end{array}$$

$$\begin{array}{ccc}
FUFU(F(a)) & \xleftarrow{FU} & FU(F(a)) \\
F\eta(U(a)) \left(\begin{array}{c} \uparrow \\ \downarrow \end{array} \right) & & \downarrow \varepsilon(F(a)) \\
FU(F(a)) & \xleftarrow{FU} & F(a)
\end{array}$$

$$\begin{array}{ccc}
FUF(a) & \xleftarrow{F} & UF(a) \\
F\eta(a) \left(\begin{array}{c} \uparrow \\ \downarrow \end{array} \right) & & \uparrow \eta(a) \\
F(a) & \xleftarrow{F} & (a)
\end{array}$$

5 Monad

\end{array}$$

$\mu(T(d)) = T\mu(d)$?
 $(m, (m'm'', a)) = (mm', (m'', a))$ No, but
 $\mu\mu(T(d)) = \mu T\mu(d)$.

11 Ok

$T(g)\mu(c) = T(\mu(d))T^2(g)$ であれば良いが。
 $\mu(d)T^2(g) = T(g)\mu(c)$
 ちょっと違う。 $\mu(d)T(\mu(d))T^2(g)$ が、
 $\mu(d)\mu(d)T^2(g)$
 となると良いが。
 $\mu(d)T(\mu(d)) = \mu(d)\mu(T(d))$

cf. $FUFU, FU$ has objects of B .

$$\varepsilon \circ \varepsilon : FUFU \rightarrow 1_B 1_B$$

$$\begin{array}{ccc} FUFU(b) & \xrightarrow{\varepsilon^{FU(b)}} & 1_A \\ \downarrow FU\varepsilon(b) & & \downarrow 1_a\varepsilon(b) \\ FU1_B(b) & \xrightarrow{\varepsilon(b)} & 1_B \end{array}$$

that is

$$\begin{array}{ccc}
 FU(b) & \xrightarrow{\varepsilon_{FU(b)}} & FU(b) \\
 \downarrow FU\varepsilon(b) & & \downarrow \varepsilon(b) \\
 FU(b) & \xrightarrow{\varepsilon(b)} & b
 \end{array}$$

$\varepsilon(b) : b \rightarrow \varepsilon(b)$ arrow of B

$\varepsilon : FU \rightarrow 1_B$

$\varepsilon(b) : FU(b) \rightarrow b$

$$b \xrightarrow{U} U(b) \xrightarrow{F} FU(b) \xrightarrow{\varepsilon(b)} b$$

replace f by $\varepsilon(b)$, a by $FU(b)$ in naturality $\varepsilon(b)FU(f)a = f\varepsilon(a)a$

$\varepsilon(b)FU(\varepsilon(b))FU(b) = \varepsilon\varepsilon(FU(b))FU(b)$

remove $FU(b)$ on right,

$\varepsilon(b)FU(\varepsilon(b)) = \varepsilon(b)\varepsilon(FU(b))$

this shows commutativity of previous diagram

$\varepsilon(b)\varepsilon(FU(b)) = \varepsilon(b)FU(\varepsilon(b))$

that is

$\varepsilon\varepsilon FU = \varepsilon FU\varepsilon$
